DASHBOARD
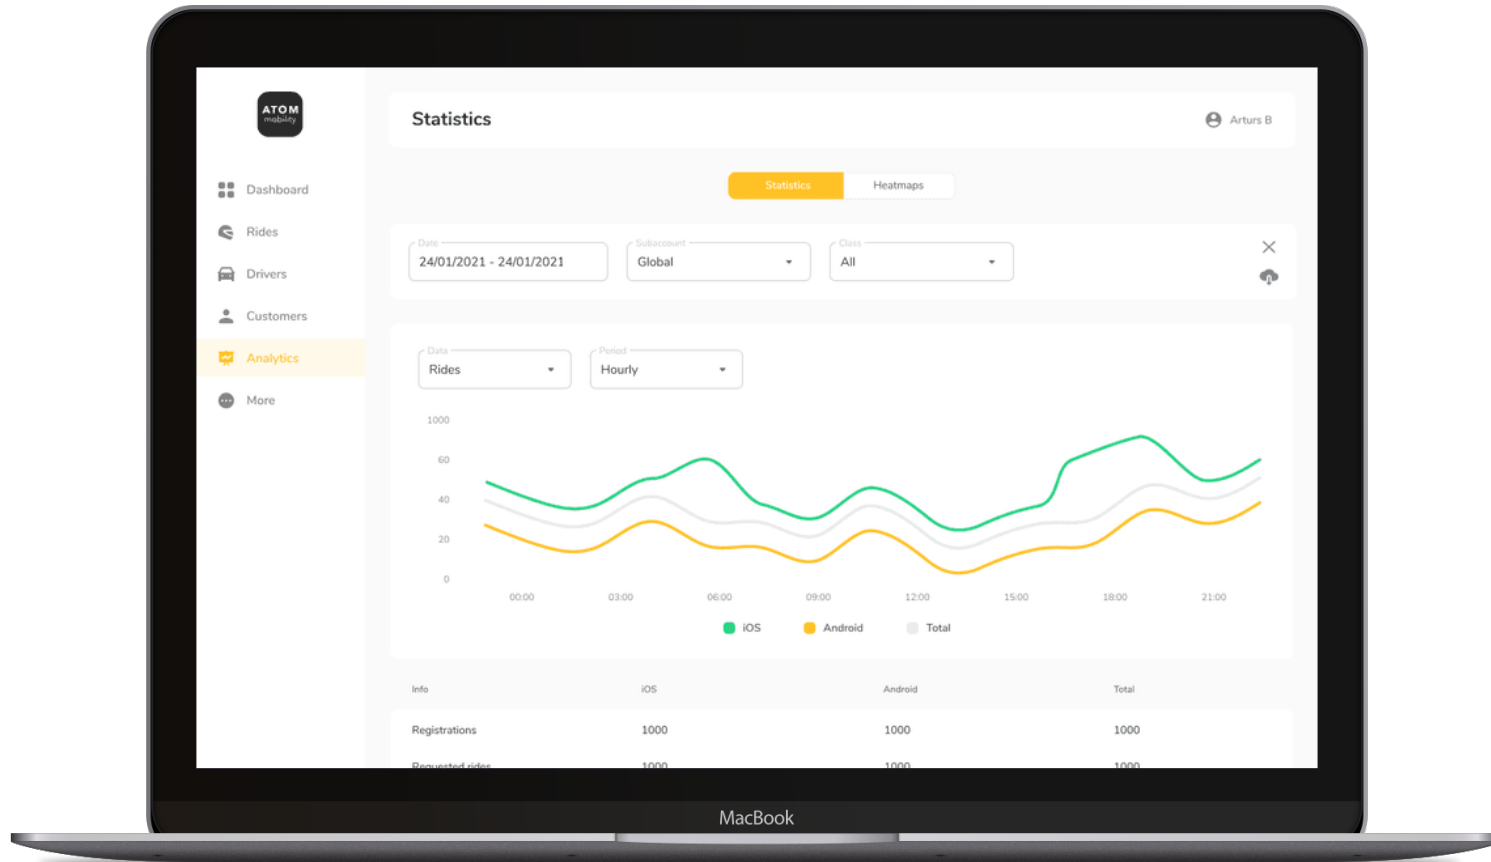

Real-time data about rides and drivers

Monitor and control your drivers and rides at every moment

Statistics

Analyze conversion rates, user feedback, heatmap, rides all in one place
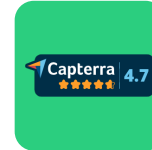

Secure And Remote Access

Secure access with different roles & limitations for your team

WHY ATOM MOBILITY?

Speed to market

Everyone claims to be fast, but only ATOM Mobility has enabled a business **launch in as little as 3 days** and many others in less than 20. We always deliver on time, and that makes a big difference.

Continuous development

Great products require experience. Thanks to a fleet of 10,000+ vehicles in 24 countries we gather data at scale and use it to constantly improve our product and add **new features every month**.

More agile, more scalable

Most solutions are either enterprise-only (and therefore up to 5X more expensive) or good for small businesses but not suitable for when a business grows. That's why we made it our mission to offer the best of both worlds.

Global reach

With 10+ different payment gateway integrations, we **support all regions** and enable entrepreneurs to successfully launch their business wherever they are.

Proven and trusted provider

We have been on the market since 2018 and customer satisfaction was always a top priority. This allowed us to scale rapidly, receive a lot of positive reviews and **trust from 100+ customers**

Beautiful, high-converting UI

Businesses running on ATOM enjoy an **incredible activation rate** with 35-55% of users making the first ride within a week, well above industry standards.
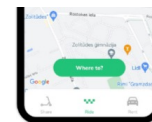

Dedicated customer success manager

You can't run your business without the reassurance of fast, effective support when needed, which is why your **dedicated customer success** team is there for you. Every single month we spend time with EACH customer to ensure they reach their goals.

Expand to other verticals easily

ATOM is building a superapp to help you quickly expand to other business verticals and increase your revenue. Currently you can launch **vehicle sharing, ride-hailing and long-term rental business in 1 app**
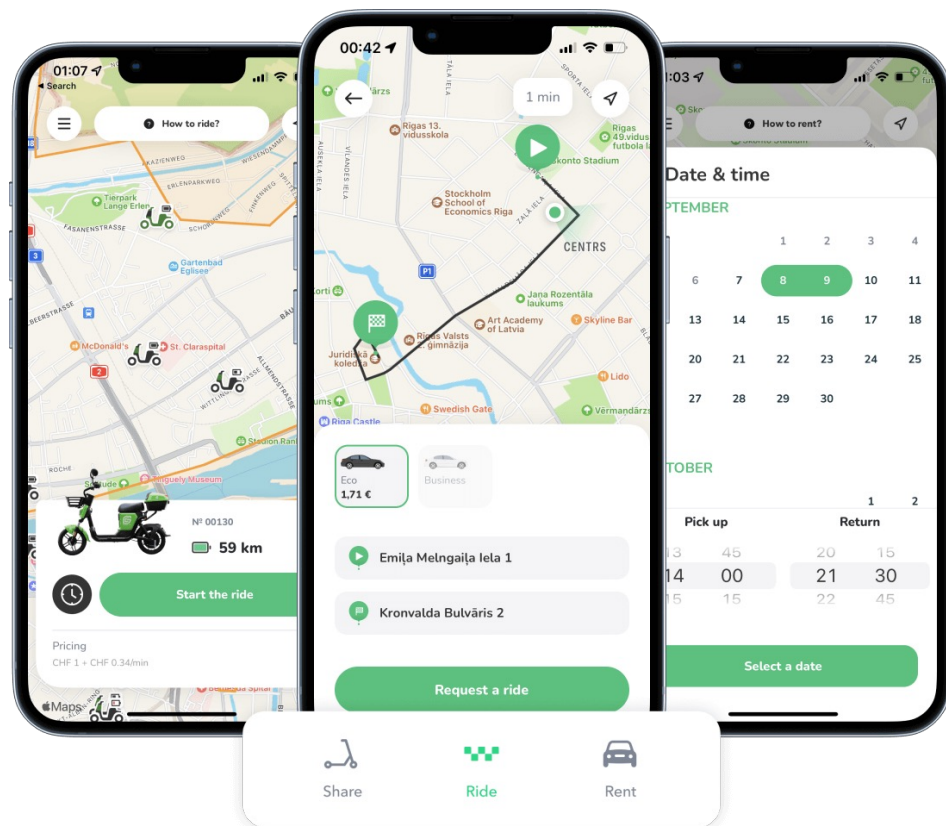

EXPAND TO NEW BUSINESS VERTICALS

MICROMOBILITY, RIDE-HAILING, AND DIGITAL RENTAL - ALL IN 1 SUPERAPP

BUY 2 OR 3 MODULES AND **GET 40% OFF** FROM THE CHEAPEST SET UP FEE

CASE STUDY: VIFT

Country: Sweden

Google Play:

https://play.google.com/store/apps/details?id=vift.app

"Using ATOM Mobility's platform, we were able to open up our taxi business to an entirely different target market – younger people. We've been able to offer a more simplified booking process to continue offering quality service to our customers, which is our guiding principle." - Jamal, Founder and CEO of Vift
